

Solution Architecture

Date	01 July 2026
Team ID	SWTID-2026-9325
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Solution Architecture Diagram: The proposed AI Debt Relief Platform follows a layered architecture that separates the application into Presentation, Application, and Data layers. This modular design improves scalability, maintainability, security, and performance by assigning specific responsibilities to each layer.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides a responsive user interface for registration	React.js, HTML5
API Gateway	Handles client requests, business logic routing,	Flask, REST API
Core Logic Service	Processes user financial data, analyzes debt, predicts repayment plans	Python, scikit-learn, pandas
Database Layer	Stores user profiles, debts, expenses, repayment history, budgets	MySQL, SQLAlchemy
