

Project Executable Files

Date	15 July 2026
Team ID	SWTID-2026-9325
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	No

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

AI-POWERED-DEBT-RELIEF-PLATFORM/

```
|
|
|─ Backend/
|  |─ .venv/
|  |─ __pycache__/
|  |─ .env
|  |─ .gitignore
|  |─ ai_engine.py
|  |─ auth.py
|  |─ crud.py
|  |─ database.py
|  |─ debt_relief.db
|  |─ gemini_service.py
|  |─ main.py
|  |─ models.py
|  |─ README.md
|  |─ requirements.txt
|  |─ schemas.py
|  |─ test.py
|  └─ test_backend.py
|
|─ Frontend/
|  |─ dist/
|  |─ node_modules/
|  |─ public/
|  |─ src/
|  |  |─ assets/
|  |  |─ components/
|  |  |─ pages/
|  |  |─ App.jsx
|  |  |─ main.jsx
```

```

| | └─ index.css
| └─ .gitignore
| └─ .eslintrc.json
| └─ index.html
| └─ package.json
| └─ package-lock.json
| └─ README.md
| └─ vite.config.js
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	Localhost
Repository Link	https://github.com/tharun061/Demo
Demo Video Link	Not Available

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

- ☐ Clone the GitHub repository.
- ☐ Open the project in Visual Studio Code.
- ☐ Open a terminal in the **backend** folder.
- ☐ Install dependencies:

```
pip install -r requirements.txt
```

- ☐ Configure the .env file with API keys and database settings.
- ☐ Start the Flask backend:

```
.\venv\Scripts\uvicorn.exe main:app --reload
```

- ☐ Open another terminal in the **frontend** folder.
- ☐ Install frontend dependencies:

```
npm install
```

```
npm run dev
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI recommendations depend on the quality of user financial data	Provide complete and accurate financial information
2	External API calls may be delayed during network congestion	Retry after a few seconds
3	The application is currently optimized for desktop browsers	Mobile responsiveness can be improved in future versions
